Step 4.....	5
Step 5.....	6

Preface

With Gitkraken, it is a default option during repo initialisation to clone the repo locally. For this assignment, this option was disabled to allow for the facilitation of the process in case a user is cloning a pre-existing repository.

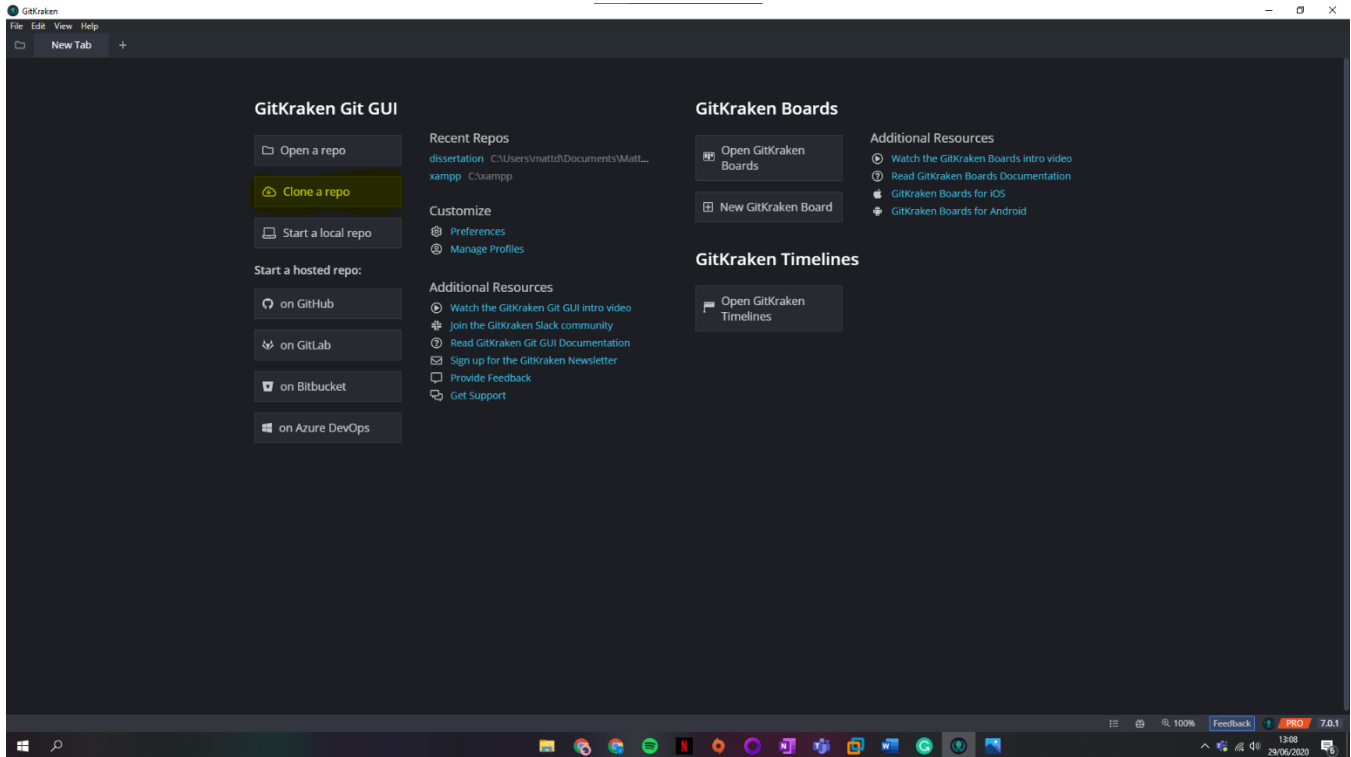

Step 1

Launch Gitkraken.

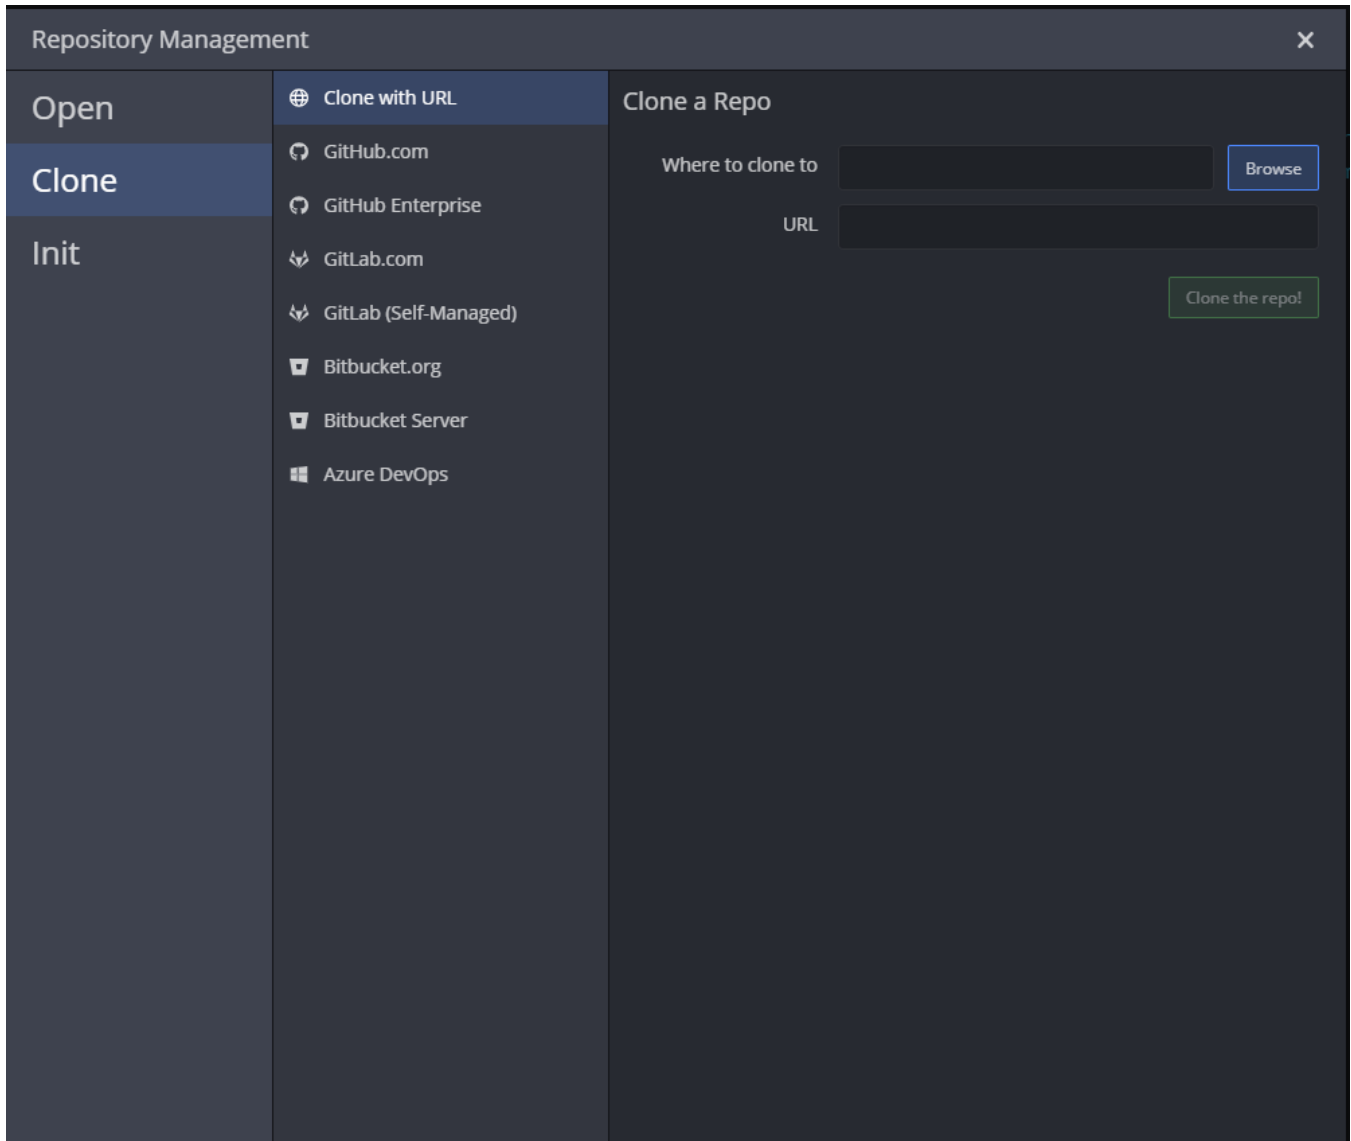

Step 2

From the default launch tab, select the **Clone a Repo** button.

Step 3

The **Repository Management** menu will come to appear with a different selection of menus and options.

Step 4

Fill in the required fields and select the appropriate options.

Repository Management
